DURABILITY GUARANTEED

Electronics in a watery and chlorine-rich environment are extremely vulnerable. To ensure the durability of its products, iSLIDE manufactures all systems in-house. From engineering to production and from software programming to on-site installation, iSLIDE doesn't use any third parties. iSLIDE has been specialized in making electronics in swimming pools for over 20 years and employs the best technicians in the world.
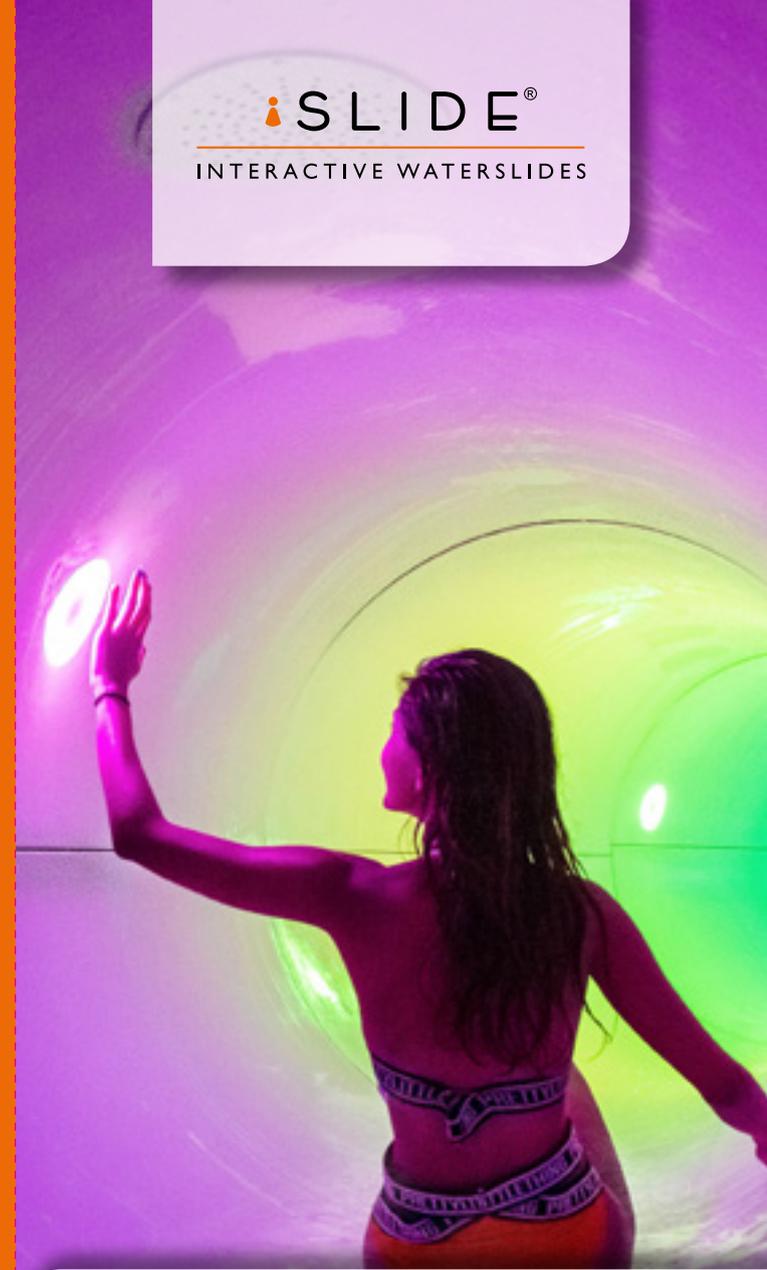

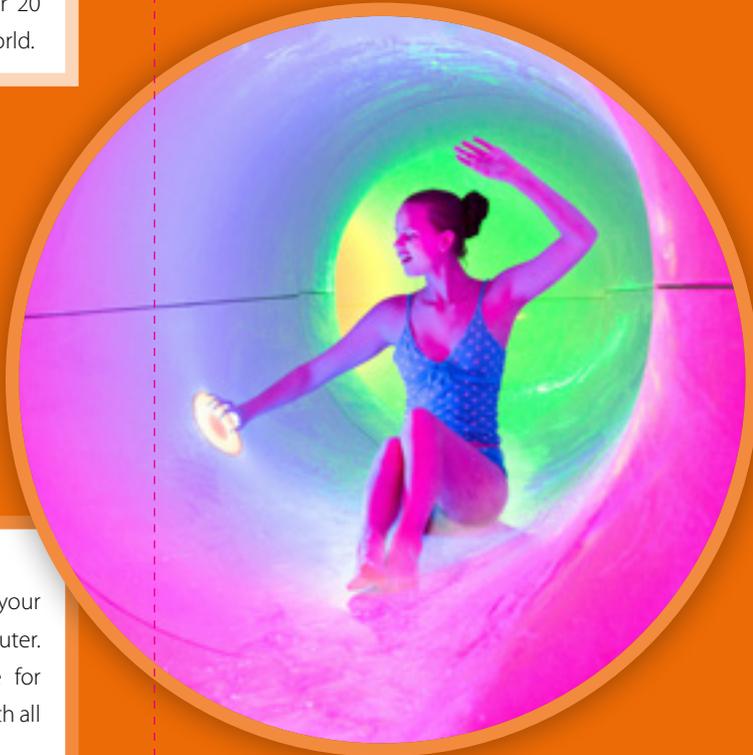

PRIVACY OF YOUR VISITORS

The IT specialists of iSLIDE ensure that all of your visitors data is stored on a very secure computer. All data is encrypted and made unreachable for unauthorized persons. iSLIDE systems comply with all EU and US privacy legislation.

CONTACT

Do you want to upgrade your water park and get significantly higher visitor numbers for an average investment of only 20% compared to building a new waterslide? Contact us now! An iSlide Technical Advisor can look at your situation free of charge and can make you a quotation without any obligation.

iSLIDE®
INTERACTIVE WATERSLIDES

Make your waterslide an
**interactive
computer game**

With iSLIDE, you can turn any new or existing water-slide to the new interactive gaming experience of the future. iSLIDE makes many different futuristic effects in waterslides, so that they respond perfectly to the needs of today's youth.

- Touchscreens
- Lighting
- Audio
- Video projections
- Luminous touchpads
- Waterscreens
- Lasershows
- Speedometers
- Luminous rings
- Photo shoot
- Video recording
- Scoreboard

iSLIDE makes these components into an overall interactive game that any child (and adult) will want to share directly on social media through touchscreens in the pool.

Imagine choosing your game mode on the touch-screen. When the light goes green, you start sliding and the moving luminous rings give you the feeling that you're launched. Moving images are projected in the waterslide as you slide across and at the same time, you try to hit as many luminous touchpads as possible to score points. You see a moving dinosaur coming towards you and you slide through the projection on a water screen. Soaked by the music and laser effects, are you in a different world? When you get out of the waterslide, look at the big scoreboard if you have the best score of the day and watch the video made of your ride. On the touchscreen, enter your email and share your video and score via social media with your friends. By your email address, the water park keeps you informed when there are new exciting things to experience.

ONLINE NETWORK

All iSLIDE interactive systems are connected online to the iSLIDE network®. This allows iSLIDE to monitor the system 24/7, update the system, and add new videos and games. Connection to the iSLIDE network® is free.

MORE VISITORS

Many of the largest water parks in the world now run iSLIDE systems on their slides. Those water parks have seen their visitor numbers increase by 20 to 30%. Not only they attract more visitors, but visitors stay longer, about an additional 1½ hours on average.
